

Facility and Real Estate

Need to build an application for the real estate industry that would perfectly match your unique business needs? We'd be glad to assist real estate and facility companies with challenges they have.

The real estate domain remains one of the most prominent sectors in every country's economy, generating millions of dollars each year and giving rise to employment development and high rates of output. Today brokers and real estate representatives strive to reach their customers via multiple channels what prompts them to seek ways for high-tech innovations investments.

From versatile smart home apps to complete building automation - InToSoft team can make an application that will enable its users to take full control of the buildings - be it your own house or a big office building. Moreover, we make software that allows to get all the info on your apartment building and hotspots around it.
