

Calcullery

Calcullery is a mobile application for jewelry business and their buyers that provides information about metals and gems directly to the target audience.

Regardless of the location, Calcullery will help to find the nearest store with the best assortment of precious metals and gems.

Calcullery increases revenue by making your shop closer to potential buyers. The lists of stores and products are updated daily, which allows the buyer to be aware of the most up-to-date information.

With Calcullery, owners can promote their assortment and notify their clients about the availability and the cost of jewelry. The app also provides info on stores' geographical location and contact details.

Our product greatly facilitates the buying process and makes it less time-consuming. It takes a few minutes to choose metals and gem buyers like, find info on their prices and choose a store to make the purchase.
