

Dodivana

Dodivana enables food suppliers to show, promote and sell their products to a large public in an easy way.

The service:

- Delivers a range of technology-specific services that increase revenue and potential profit;
- Allows to concentrate on business and not on technical items;
- Keeps up with modern technology trends via supporting all platforms, web and mobile (system is adjusted for all devices and screen sizes, including smartphones and tablets).

The system consists of the following solutions:

CRM for food suppliers

- General supplier functionality with food supplier information management, products management, catalog structure management;
- Marketing campaigns management with the ability to select key audience.

Web application and Mobile applications for final consumers

- Select suppliers / regions / food and other criteria, simple catalog navigation;
- Bonus and reward systems.
