

ShopyPro

ShopyPro is a multiplatform mobile application for e-commerce retailers aimed to increase commodity turnover and boost shop owners' revenue.

ShopyPro is a B2C mCommerce solution that consists of a mobile app for customers and the server part that ensures providing the latest info on promotions, new arrivals and discounts straight on the buyer's smartphone.

Increase your sales with ShopyPro:

- Integrate your online shop with ShopyPro within a few clicks. The info will be updated automatically every day.
- Built-in statistics gives full information on sales figures from the Mobile App, including shop statistics, promotional statistics and redirections to the on-line store.
- Embedded barcode scanner and interactive search functionality make the purchasing process effective and effortless.
- Built-in live chat brings the sellers closer to their key audience.
- Advertising and promotional tools expand the online loyalty programs and allow to keep regular customers informed about the ongoing campaigns.
